SKILLS

Languages: Python, C/C++, SQL (MySQL, PostgreSQL), JavaScript, TypeScript, HTML

Developer Tools: Git, Google Cloud Platform, AWS, VS Code, Visual Studio, Eclipse, Android Studio, Unity

Libraries: Mistral LLM, Nuxt.js, Next.js, Svelte, React, Pandas, NumPy, Tableau, Matplotlib, TensorFlow, PyTorch

Frameworks: React Native, Flask, FastAPI, TailwindCSS, Postman

Relevant Coursework: Data Structures and Algorithms, Object Oriented Programming, Web Development, Operating Systems, DBMS, Knowledge Graphs, Computer Networks, Machine Learning, Android Development

EXPERIENCE

Powerloom Protocol | *Frontend Developer*

Jun 2024 – Present

- Created a website to launch OCP token, and added features to incentivize community members and staking POP token to earn rewards.
- Worked on Generative Prediction Markets (GPM) which run on the Defi data provided by Powerloom Protocol.
- Created and improved Snapshotter Dashboard, where community members who have slots could see their rewards and node status.
- Working products to release POWER token.

SachteK | Freelance

Sep 2023 – Mar 2024

- Designed and Developed custom application according to client's requirement.
- Developed a mobile application, AD Numeroscope, designed to calculate numerology values and generate personalized charts based on the user's name and date of birth. The app provides insights into numerological interpretations.

NoncebloX | Software Analyst

Jun 2023 – Aug 2023

- Created web3 solutions for NFT and Web3 Games marketplaces
- Integrated blockchain technology and AI-powered NFT creation into applications.
- Developed a custom Content management system.

BirlaSoft | Intern

Jun 2022 – Jul 2022

- Contributed to projects involving Microsoft Azure, hybrid device management, network protection, and vulnerability detection.
- Gained experience in diverse device management across platforms.

Internship Studio | Intern

Aug 2021 – Sep 2021

- Detecting vulnerabilities, employing ethical hacking techniques to fortify systems, and developing effective strategies for mitigation and risk reduction.

EDUCATION

Jaypee University Of Information Technology

Jun 2019 – Jun 2023

Bachelor of Technology in Computer Science

CGPA: 9.0/10.0

ACHIEVEMENTS

- Qualified for the GATE exam in both the pre-final and final years of my Bachelor's degree.
- Served as a technical reviewer for "My First Mobile App for Students" by Zaid Kamil, enhancing content quality and ensuring accuracy.

PROJECTS

- Samachar Ai** | Python, LLM, PyTorch, Git, Google Cloud Platform, VS Code, Kaggle  Sep 2023 – Present
- Developed a AI video creator to make and upload news on Youtube using Python, LLM, PyTorch, and Google Cloud Platform, supporting 8 Indian languages.
- Hotel Booking System** | Next.js, Tailwind, TypeScript, Strapi CMS, Stripe  Dec 2023 – Jan 2024
- Created a hotel room booking website with Next.js, Tailwind, TypeScript, and Strapi CMS, integrating a secure payment gateway.
- ASL Real-Time Image Processing Apk** | ML, ASL, TensorFlow, Java  May 2021 – Jan 2022
- Created an ASL Recognition Android app with ML models for accurate ASL symbol detection, user-friendly interface, real-time feedback, and text-to-speech conversion.
- Blind Assistance Application** | Computer Vision, Ui/Ux, Gps, Tts, Pytorch  May 2022 – Jun 2023
- Created an app for the visually impaired using computer vision, GPS, and PyTorch.
